

Get Your Staff Their Ham Radio Licenses in Just One Day!

Special for public safety, EMS, hospitals, etc.

Our “HamCram” Technique has a Better Than 90% Pass Rate

California Emergency Volunteers, a 501(c)(3) non-profit founded to support and train first responders wants to help more of them get a ham radio license.

For nearly a decade we have run a very successful one-day licensing event called a HamCram. Your staff can get their Amateur Radio License in a single day using our proven technique. **No Morse code test is required!**

Thousands have gotten their licenses at our events by studying the actual questions and answers, some of which will appear on the FCC exam given at the end of the day.

No memorization is required. With the HamCram technique the answer that “looks right” usually is. More than 90 percent of students pass their license exam on their very first try.

This is NOT a ham radio training course. Those can be arranged separately.

HamCram is an easy way for emergency workers (paid and volunteer), CERT team members and others who might use Amateur Radio in an emergency to get their licenses.

Hams provide critical communications when emergency strikes. Amateur Radio is also useful for volunteer events or just as an exciting hobby.

There is no easier or quicker way to get a ham radio license.

HamCram is for persons seeking their first license (Technician Class) as well as current hams seeking to upgrade from Technician to General Class.

We are offering a limited number of free HamCrams for agencies and organizations in San Joaquin County. You provide the location and printing – about 80 pages per attendee.

We’ve already trained hospital staff, law enforcement, EMS, tribal government and other groups. We are looking forward to helping your team gain an additional communication resource.

For more information and to find out if your agency/organization qualifies visit www.cevol.org/free or email hamcram@hamcram.org
